If the Dealer determines that it has not received such amounts, the Swap Counterparty may exercise its option to terminate the Swap Agreement and the Issuer shall repurchase the Notes in accordance with the Repurchase Condition, which will lead to the termination of the Deposit Agreement.

Where the Aggregate Final Payment Amount is equal to the Final Deposit Payment, no further payment will be made under the Swap Agreement.

In this case, a short explanation has been provided to summarise why no relevant information can be given.

Section D - Risks

Element	Title	
D.2	Key risks regarding the Issuer	There are certain factors that may affect the Issuer's ability to fulfil its obligations in respect of the Notes. These include that the Issuer's sole business is to enter into, perform and serve as a vehicle for any transactions permitted under the Securitisation Act 2004. The Issuer is not expected to have any assets that are available to Noteholders other than the Charged Assets and Noteholders will have no recourse to any other assets in respect of the Issuer's obligations in respect of the Notes. The ability of the Issuer to meet its obligations under the Notes will depend on the receipt by it of payments under the Swap Agreement and the Deposit Agreement. Consequently, the Issuer will be exposed to the ability of BNP Paribas in respect of the Swap Agreement and BNP Paribas Fortis SA/NV in respect of the Deposit Agreement to perform its obligations thereunder and to its general creditworthiness. BNP Paribas will not provide credit support for its obligations under the Swap Agreement. The Issuer will be the sole party liable in respect of the Notes. In the event of insolvency proceedings in relation to the Issuer, Noteholders will bear the risk of delay in settlement of their claims they may have against the Issuer in respect of the Notes or receiving, in respect of their claims, the residual amount following realisation of the Issuer's assets after preferred creditors have been paid.

Element	Title	
		<p>In addition to the foregoing, the Issuer has identified in the Base Prospectus a number of other factors which could materially adversely affect its business and ability to make payments due in respect of the Notes. These factors include risks relating to the limited recourse of the Noteholders to the assets of the Issuer relating to Compartment 2014-264; insolvency of the Issuer and the consequences thereof; and The Dodd-Frank Wall Street Reform and Consumer Protection Act [H.R. 4173] of 2010.</p>
D.6	Key risks regarding the securities and risk warning	<p>There are certain factors which are material for the purposes of assessing the market risks associated with the Notes, including that the trading price of the Notes is affected by a number of factors including, but not limited to, the performance of the Underlying Reference, time to redemption and volatility and such factors mean that the trading price of the Notes may be below the Final Redemption Amount, exposure to the Underlying Reference will be achieved by the Issuer entering into hedging arrangements and potential investors are exposed to the performance of these hedging arrangements and events that may affect the hedging arrangements and consequently the occurrence of any of these events may affect the value of the Notes, the occurrence of an additional disruption event or optional additional disruption event may lead to an adjustment to the Notes, early redemption of the Notes or may result in the amount payable on scheduled redemption being different from the amount expected to be paid at scheduled redemption and consequently the occurrence of an additional disruption event and/or optional additional disruption event may have an adverse effect on the value or liquidity of the Notes, expenses and taxation may be payable in respect of the Notes, the provisions relating to meetings of Noteholders permit defined majorities to bind all Noteholders, any judicial decision or change to an administrative practice or change to English law and/or Belgian law after the date of the Base Prospectus could materially adversely impact the value of any Notes affected by it, certain conflicts of interest may arise (see Element E.4 below), the only means through which a Noteholder can realise value from the Notes prior to their Maturity Date is to sell them at their then market price in an available secondary market and that there may be no secondary market for the Notes (which could mean that an investor has to wait until redemption of the Notes to realise a greater value than their trading value).</p> <p>In addition, there are specific risks in relation to Notes which are linked to an index and an investment in the Notes will entail significant risks not associated with an investment in a conventional debt security. Related risk factors include: exposure to one or more index, adjustment events and market disruption or failure to open of an exchange which may have an adverse effect on the value and liquidity of the Notes.</p> <p>In addition, in relation to any Note, only the Trustee may take action (including enforcement action) against the Issuer, and is not obliged to take any such action without first being indemnified and/or secured to its satisfaction.</p> <p>Investors should be aware that they may lose the value of their entire investment (together with, in addition to such investment, any amounts which may have accrued on such investment but which have not been paid) or part of it, as the case may be.</p>
